# ISA 1932 Flow Nozzle

## ISA 1932 Flow Nozzle

ISA 1932 Flow Nozzles are designed for high pressure and high temperature applications where low permanent pressure loss and high accuracy are required. They are precision machined as per international standards and mounted between flanges like an orifice plate.

## Technical Specifications

<b>Pipe Sizes</b>	15 NB to 600 NB
<b>Design Standards</b>	ISO 5167, ASME, R.W. Miller, AGA
<b>Pipe / Flange Material</b>	Carbon Steel, Stainless Steel, Alloy Steel, Hastelloy, Titanium, Monel
<b>Nozzle Material</b>	Stainless Steel, Hastelloy, Titanium, Monel
<b>Mounting Type</b>	Flanged or Welded in Pipe
<b>Applications</b>	Gases, Liquids, Steam
