ORIFICE PLATE ASSEMBLIES

ORIFICE PLATE ASSEMBLIES

Orifice plate assemblies are the most commonly used differential type flow measurement element in the process industry. These are precision machined as per various international standards. The assemblies are available with Weld-neck, Slip-on, Socket Weld and Screwed type flange mountings. These are the simplest for installation and maintenance.

Technical Specifications

Pipe Sizes	Any Size
Design Standard	ISO 5167, ASME, AGA, R.W.Miller, etc.
Orifice / Flange Material	Carbon Steel, Stainless Steel, Alloy Steel, Hastelloy, Titanium, Monel, etc.
Types	Square Edge, Eccentric, Quarter Circle, Conical, Multi Hole, Segmental, Compact, etc.
Mounting type	Flanged, Butt welded in pipe
Typical Applications	Gases, Liquids, Steam
