Venturi Nozzle

Venturi Nozzle

Venturi Nozzle is a pressure type flow element generally used in fire-fighting systems to measure the water flow. A differential pressure is produced proportional to the flow rate due to the precisely machined profile of the flow element. The display can be analog or digital.

Technical Specifications

Pipe Sizes	25 NB to Any size
Design Standards	ISO 5167, ASME, R.W. Miller, AGA
Pipe / Flange Material	Carbon Steel, Stainless Steel, Alloy Steel, Hastelloy, Titanium, Monel
Wedge Material	Stainless Steel, Hastelloy, Titanium, Monel
Mounting Type	Flanged, Butt weld
Applications	Gases, Liquids, Steam
